

Careers Strategy 2021/2022

Mission statement:

LAET Tottenham's careers programme aims to support, challenge and empower students to make confident and informed decisions around their next steps.

Key aims of the LAET careers offer:

- Provide outstanding information, advice and guidance around careers.
- Ensure students have opportunities to explore various options, make informed choices and be able to prepare high-quality applications
- Build student confidence and resilience to succeed in the workplace
- Support students in creating lifelong professional networks and contacts
- Present students with an opportunity to undertake a workplace experience via work visit, work shadowing, and or work experience

About LAET

At LAET our student body is made up of highly academic students with broad interests in various subject pathways which include Medicine, Law, Finance and Engineering. We are a school representative of the multicultural area of Tottenham in which the school is based; it is an area of high deprivation with students who have high aspirations. A number of our students often have a narrow focus on their final university courses and therefore require/are supported with guidance in broadening their understanding of the various subject options and pathways available allowing them to make informed decisions. We also encourage our students to gain valuable skills and new experience through a range of careers and co-curricular provision whilst also challenging them to avoid narrow courses that may limit their chance to university entry.

Quality Review, Reporting and Monitoring

The school is committed to the Ofsted requirements for providing high quality careers guidance and recognises the need to build on this for continual quality improvement.

The School will use student intervention data, UCAS data, student feedback, online surveys, questionnaires and focus groups to monitor the effectiveness of the Careers Strategy.

This Careers Strategy will be reviewed on an annual basis by the Careers Team and Careers Lead who will provide a summary report to the Board of Governors annually

Summary of the careers offer at LAET:

Year 1 Objectives:

- Students are required to attend specific general talks from our career speakers program, from professionals in a wide range of career paths.
- Students will attend tailored talks from the autumn term to assist their decision making ahead of making degree choices.
- All students will have at least one experience of the workplace either through work experience or a real world challenge facilitated by LAET.
- All students will have had an experience of a professional interview either virtually through Shortlist Me or face to face.
- All students will be signed up to the schools Careers & Enrichment Google Classroom where various careers related opportunities including summer schools, insight days and workshops are advertised.
- We will consistently engage with Parents at LAET and at our feeder schools. This will include arranging events at LAET ensuring we have open and honest discussions about students' options. We will also ensure we are a visible presence in attendance at feeder school events such as open days.

Year 2

- Students are offered the option of attending specific general talks from our careers speaker programme to support their decision making as they finalise their UCAS choices
- All students should develop a high quality CV during their time at LAET.
- Students will be provided with 1-1 guidance to assist them with their post 18 options.

- Network building, students will be provided with details on a range of industry/pathway networking events
- Students will be provided with information on the range of viable quality degree apprenticeship options (and supported with the application process).

Chrysalis East

As an extension to our careers provision, Chrysalis East aims to build on our experience and partnership with our local schools that mirrors the provision LAET students receive. We intend to:

- Liaise with our feeder and local primary schools to establish valuable support to their careers programmes.
- A targeted program that provides bespoke CEIAG and access to super curricular (work experience, summer school, and internships) for up to 50 aspirational students from our local feeder schools.
- Build genuine relationships with local parents, regularly welcoming them to LAET events and providing support where required.
- Provide a Summer school for students in years 7, 8 and 9 that offers learning opportunities, and careers guidance whilst encouraging aspiration.

Careers Provision in detail

Careers Speakers programme

Throughout the spring and summer terms LAET will host a series of external speakers, across a wide range of sectors and roles. Our students will be encouraged to be 'open-minded' in their approach, attending at least two talks that may not be clearly aligned to their current career path. The aim is to support students in developing an understanding of the range of possibilities and options available to them.

Career Pathways

In year 12, students complete a careers survey indicating their career field they are most interested in, which may include: Business and Finance, Digital & Computing, Law, Education, Engineering, Healthcare, Creative Industries, Psychology, Journalism, Politics, Entrepreneurship. The aim of identifying these strands is to better direct specific opportunities to our students.

Degree specific pathways such as Medicine & Healthcare will also be identified and groups of students who this applies to will receive bespoke support. This will be an ongoing focus during the course of the year ahead of 'early applications' in their final year.

We recognise that the majority of our students highlight a significant interest in **Medicine, Engineering, Finance** and **Law** therefore we aim to explore these via tailored support through the workshops, speakers programme and events that we promote. We also put on workshops with London Enterprise Adviser Network (LEAN) to support those who are unsure of their career path

We understand the need to ensure that pupils are increasingly aware of both the traditional and less traditional routes into employment. Whilst nearly all of our pupils currently move onto higher education institutions, we recognise the continued developing interest in apprenticeships, vocational pathways and entrepreneurship; as such, over the next few years, we are seeking to develop our knowledge and understanding of these areas by widening access to specialist post-18 careers advice.

Apprenticeship

Through a range of assemblies and workshops students will be supported in understanding the different levels of apprenticeships available and identifying the range of quality degree apprenticeships across the various pathways that they are interested in. We work alongside a number of organisations including ASK apprenticeships and 'White Hat' in ensuring our students are informed of the options available to them.

Internships

We also intend to source/create new internship opportunities for our students with new corporate partners. We recognise that it is important to educate our students on the benefit they provide in providing personal finance or as a source of financial support to students. Our students will also be encouraged to source internships and experiences of work.

Chrysalis East Fellows

We will also be creating employment opportunities by hiring year 14 students during their gap year or prior to attending university. Our students will be seconded to the Chrysalis programme at our partner school 'Highgate' and will support the work of Chrysalis East and the Chrysalis programme at LAET and our partner schools.

1 to 1 Personal Guidance

We will ensure that both LAET and our feeder school students are provided 1:1 guidance with our Careers Team. All students in year 12 will be provided with at least one 1 to 1 personal guidance session with our registered career advisers. In addition, using a targeted approach we will ensure that our 'vulnerable', 'uncertain' and students exploring varied post 18 options receive 1 to 1 guidance sessions with our qualified careers advisers.

Students at our feeder schools will also be provided with 1:1 guidance on recommendation by their teachers or were identified by a member of one of the LAET careers team.

Workshops/Highgate Events

We hold exclusive partnerships with a number of firms: **Texel, PaymentSense, Three Raymond Partners, Allianz, 5kbw, 7kbw, Knight Frank** who hold various employability workshops for our students.

Our partners at Highgate also provide our students with access to a range of employer networking events and interactions that allow students to network with employers and their peers.

Work Experience

We will work together with our partners (Highgate and THFC), employers and external agencies to arrange/direct students to work experience opportunities.

We publish a work experience guide, provided by Highgate to support students in their work experience endeavours. Our students take an active role in the community and have the opportunity to take part in a community project, many of which happen in local organisations and schools.

These workplace experiences allow our students to better understand the day-to-day experience of their chosen field. In light of the past academic year these experiences may primarily take the form of virtual experiences.

Mentoring

In partnership with our principal partner (Highgate) and Career Accelerator we offer an annual mentoring program for our students through the Autumn and Spring terms. We are strategic in our approach, currently working with Career Accelerator to address the lack of diverse representation in the digital sector.

We remain open to sourcing/developing additional programmes that include a range of career fields and are therefore currently exploring additional opportunities in Finance, Law and Creative Industry mentoring.

Super-curricular Classroom

We will continue to regularly post information on opportunities in the google classrooms, which serve to broaden our students' learning by providing information on work experience opportunities and widening participation programmes.

Real-world-challenges

Our industry partners will continue to set our students' problem solving activities and authentic professional challenges in order to replicate the type of experiences our students will face in the future. As well as optional challenges set by Allianz, Dartmouth Partners and others, we intend to partner with our industry

partners in providing our students with a whole school annual challenge. We want our students to understand the diverse roles which are available within all organisations, putting a real focus on employability skills.

Structure of our programme offer

The programme will include but not be limited to a number of key events throughout the school academic year:

Year 12 Key Dates

Yr 12 Half Term One

By the end of this half term, students will have begun to develop an understanding of the importance of super curricular opportunities and what degree apprenticeships exist and how to apply for them. There will be

DATE/MONTH	Key Events
September	<p>Student Survey "Post 18 intentions" – Students indicate initial Post 18 intentions and university course preferences</p> <p>Summer school and Super Curricular Activities – Students will attend an assembly where they will be informed about how to access these opportunities and apply for them.</p>
October	<p>Apprenticeship Assembly - Students will attend an assembly on what apprenticeships/degree apprenticeships are, which quality apprenticeships exist and how to apply.</p> <p>Parent Information Evening - Careers team to meet with parents/students to provide insight into the curriculum and application to medicine and other industries.</p> <p>LAET Careers Event A range of specialist fairs or panel discussions that broaden the understanding of careers within scarcely explored themes.</p>

Yr 12 Half Term Two

By the end of this half term, students should have informed the school what career strand they identify with and begun to apply for super curricular opportunities.

DATE/MONTH	Key Term
November	<p>Careers Survey - All students to complete a survey to identify what career strands they are interested in. To ensure they then receive tailored support from careers programs.</p>

December	<p>Introduction to Work Experience – We will be informing students on how to apply to work experience opportunities and providing workshops on how structuring their applications,</p> <p>This will be underpinned by a series of workshops on CV development and responding to an application</p> <p>Mentoring Programme - The LAET/Highgate mentoring programme students sign-up begins</p>
----------	---

Yr 12 Half Term Three

By the end of this half term, students will have explored a range of careers explored within different industries they may not have considered, participated in challenges that mirror that of professionals within those industries and have applied to work experience/internship or summer school opportunities. Students from our feeder schools will also be invited to the careers fairs.

DATE/MONTH	Key Events
Jan to Feb	<p>Careers Pathway programme The careers pathway programme provides students with an insight into exploring the range of careers in their industry of interest, participation in the Real World Challenge and applying to summer schools/work experience and Internships.</p>
February	<p>LAET Careers Event A range of specialist fairs or panel discussions that broaden the understanding of careers within scarcely explored themes.</p>

Yr 12 Half Term Four

By the end of this half term, students and parents will have attended a UCAS information evening, a higher education fair and they will have reviewed their Post 18 intentions.

DATE/MONTH	Key Events
February	<p>UCAS Parent Information Evening Students and Parents attend an introductory talk as part of parents evening</p> <p>Early Entry/Medicine Talk, An event designed to provide parents and their children with information on application process and the range of courses available</p> <p>Higher Education Fair, Highgate All Year 12 students attend the Higher Education Fair at Highgate school</p>
